PROCESS EVALUATION		
INITIAL RETROSPECTIVE STUDY: Informal interviews with key partners involved in the planning, implementation, and oversight of the pilot.	STAFF INTERVIEWS: Qualitative interviews with referral sources, housing navigators, and care coordinators to understand implementation experiences.	CLIENT SURVEY: Fielded to all clients 3 months post-exit to assess program experiences and impact on housing stability and health and other outcomes.
	PROGRAM DATA: Client data collected in EPIC during program enrollment, assessments completed by navigators, and invoices for benefit utilization.	CLIENT INTERVIEWS: Qualitative interviews with a subset of clients 6 months post-exit for in-depth exploration of program experiences and impacts.
COST EVALUATION	HEALTHCARE CLAIMS: Enrollment, demographic information, and detailed medical and behavioral health claims capturing all health care encounters for clients during the benefit through 12 months post-exit.
